

Intermediate Water /Wastewater Engineer

About the business line - Water: We create comprehensive delivery solutions for water, wastewater and wet weather systems, desalination, water resources, water reuse, tunneling, and community infrastructure through traditional and alternative delivery services such as program management and design-build.

As part of our continued growth, our Winnipeg office has an outstanding opportunity and is actively seeking a creative highly talented Water /Wastewater Engineer for immediate employment. The qualified candidate will have a successful track record in the design of complex municipal and industrial facilities. You will work in a team environment to deliver advanced water and wastewater treatment projects to our client base in Manitoba, Western Canada and beyond. For someone with an interest in pursuing water/wastewater treatment work on some of the largest and most complex projects, this is an exceptional opportunity to bring your capability to the team and advance your career.

Minimum Requirements

- Bachelor's degree in Civil Engineering, Chemical Engineering, Mechanical Engineering or related field
- 5+ years of experience in design, construction administration
- Registered Professional Engineer (MB)
- Water/wastewater treatment expertise
- Cost estimating and specification writing
- Proficient in common desktop packages
- Motivated, team player, organized, excellent communicator
- Must possess a valid driver's license

Preferred Qualifications

- Master's degree in water/wastewater treatment
- Ability to take a project from inception through conceptual, preliminary and detailed designs and ultimately through to construction and commissioning
- Strong report writing capability; Excellent communication skills
- Coordinating multidisciplinary teams
- Strong work ethic and the desire to excel
