

WINNIPEG, MB

WSP is one of the world's leading professional engineering services firms. Every day our more than 34,000 experts work to restore the natural environment and transform the built environment.

In Canada, our 8000+ people are involved in everything from environmental remediation to urban planning, from engineering iconic buildings to designing sustainable transport networks, from finding new ways to extract essential resources to developing renewable power sources for the future.

The excellence we bring to our work and to our workplace has been recognized far and wide. We're a Forbes Top Employer in Canada, one of the Top 100 Sustainable Companies in the World (and among the Top 10 in Canada), and we earned Platinum Elite Recognition through our participation in more than half of Canada's Top 100 Infrastructure Projects.

At **WSP**, we're proud, professional and passionate people. Join us.

POSITION DESCRIPTION

WSP is currently seeking a **Mechanical Project Manager/Engineer** to join our Mechanical Engineering Department. Reporting to the Manager of Mechanical Engineering. **WSP's** mechanical engineering team in Manitoba engages in the design of healthcare, educational, commercial, defence, environmental infrastructure, recreational and light industrial facilities. We work on a wide variety of projects under typical and alternate delivery methods. We provide services on projects across western and northern Canada including NW Ontario, MB, SK, AB and BC. **WSP** has an exciting career opportunity for the right individual with the skills, determination and drive to assume a senior technical and leadership role in the mechanical engineering group in the Winnipeg office.

RESPONSIBILITIES

- Reporting directly to the Mechanical Engineering Manager, works independently, and with minimal supervision
- Provides engineering Project Management of multi-discipline (S, M, E) projects for internal and external clients
- Provides senior technical leadership, mentoring and supervision to the Mechanical Team members
- Responsible for taking design projects from start to finish and applying a high level of technical, professional engineering and consulting expertise
- Complete familiarization with National, Provincial and Municipal Codes and

Standards. Ensures the design documents meet established project criteria and applicable standards. Coordinates the preparation of engineering specifications and drawings, quantities and opinions of probable cost

- Responsible for researching and implementing new technology designs as required to meet client's objectives. Utilizes industry specific software and related technologies in design and analysis
- Participates in client management, business development and proposal preparation activities
- Responsible for financial management and performance of assigned projects

QUALIFICATIONS

- University degree in Mechanical Engineering from an accredited institution
- Membership or eligibility for membership, in Engineers Geoscientists Manitoba (EGM) as well as the similar associations in Ontario, Saskatchewan, Alberta and British Columbia is required.
- LEED Accreditation and sustainable design experience are highly desirable qualifications
- PMP designation or willingness to pursue this designation is highly desirable
- CIM designation is a highly desirable qualification
- 10-15 years of experience in consulting mechanical design engineering for buildings or equivalent experience and responsibilities is required
- Experience on recent major healthcare and institutional complex mechanical projects is desired

To apply for this position please refer to the WSP website at
