

Job Posting Form

Job Title: Senior Engineer

Location: Estevan, Saskatchewan

Closing Date: June 4, 2017

Job Overview:

Depending on the candidate, the primary focus will be either Program Management or Project Management.

Program Management

- Manage assigned programs to support TEML's vision and strategic plans.
- Collaborate with stakeholders to identify and develop projects to assigned programs and align with long term strategies.
- Lead and/or provide input for defining and implementing technical solutions regarding system operations.

Project Management

- Responsible for the design and project management of capital and expense projects relating to the maintenance, upgrade, and expansion of liquid pipelines and facilities.
- Provide technical support on operational and engineering matters.

Position Responsibilities

Program Management

- Actively manage and document programs and long range project plans.
- Identify projects that align with TEML's strategies, directives, and vision through engagement with stakeholders based on initiatives, needs, regulations, and identified gaps.
- Develop projects by providing a project objective, justification, and preliminary scope, schedule, and budget.
- Facilitate effective communication between stakeholders regarding project scopes and program planning.
- Contribute to long range plans and budget submissions to ensure TEML's continued reliable operation.
- Ensure that system planning is conducted in a manner to ensure sound relationships with regulators, customers, contractors, communities, and landowners.
- Lead technical initiatives, engineering support, and studies within assigned programs.
- Provide engineering support on operational matters and assist with evaluation, justification, planning, and implementation of system improvement and maintenance items.
- Participate in What-IF analysis, PHA, and HAZOPs for projects under assigned programs.
- Ensure that mechanical, electrical, and civil facilities are planned so that TEML's pipeline systems can be operated in a safe and efficient manner.
- Steer continuous improvements of processes and procedures.

Project Management

- Manage large multi-disciplinary projects as well as maintenance and upgrade projects utilizing best practices to ensure a cost effective, fit for purpose design.
- Provide engineering support to ensure the safe and efficient operation and maintenance of TEML facilities, considering all aspects of operations, construction, operational risk management, integrity management, and expansion of pipeline operations.
- Plan and implement work in accordance with the Company's health, safety and environmental policies, Company engineering and construction standards, regulatory requirements, and applicable legislation.

- Ensure that correspondence is conducted in a manner that ensures sound relationships with regulators, industry personnel, customers, contractors, communities, and landowners.
- Direct the efforts of internal and external departments, consultants, and contractors, including those outside the incumbent's engineering discipline, to ensure that the project scope, schedule, and budget meet company objectives.
- Ensure that mechanical, electrical, and civil facilities are designed so that TEML's pipeline systems can be operated in a safe and efficient manner.
- Drive continuous improvements of processes and procedures.

Skills and Qualifications:

- 8 years of progressively responsible experience in Engineering, Operations, and Project Management.
- PEng preferred.
- High degree of personal initiative and the ability to work effectively, both independently and in a team environment.
- Knowledge of pipeline standards, regulations, industry best practices, and pipeline system operations ideally including control systems, pumps, and leak detection.
- Previous program management experience is an asset.
- Strong analytical, communication, interpersonal, organizational, and change management skills.
- Ability to work and communicate with internal and external stakeholders on a frequent basis.

We thank all interested candidates; however, only qualified candidates will be contacted, please submit your resume to careers@teml.com
