

Job Title: Process Engineer

Employer Name: Miller Environmental Corporation

Location: Miller Processing Facility located in St Jean Baptiste, Manitoba

Job type: Full-time

Job Description:

The successful candidate possesses strong chemical processing knowledge as well as process development experience.

Reporting to the Plant Manager, the Process Engineer identifies and develops processing options for chemical treatment of materials and chemical stabilization. Participates in bench and pilot tests, plant level escalation, engineering design and development. Maintains continuous monitoring of the operations and continuously improves and optimizes chemical processing procedures. Develops, maintains and reports operational Key Performance Indicators, provides mentoring and guidance to technicians. Actively participates in the health and safety program, environmental program and saving energy program.

Qualifications

Bachelor's Degree in Chemical Engineering, Chemistry or a similar discipline, or five years of equivalent training and experience. Engineers Geoscientist of Manitoba (APEGM) Member or eligible to become a member.

Minimum of 5 years of experience in the chemical processing field or related.

Excellent interpersonal and leadership.

Preferred or specific qualifications:

Knowledge in unitary operations and chemical processing equipment. Deep knowledge in mass transfer operations and gas treatment (absorption) is an asset.

Lean Manufacturing and Supervisory experience.
