

Deputy City Manager-Operations

City of Morden is recruiting for a newly developed role as the Deputy City Manager–Operations who will be responsible to provide leadership and direction in capital planning, design, construction and rehabilitation of the City's transportation, building and utility infrastructure. We are seeking a proven leader with effective management skills and a collaborative, open, honest and direct interpersonal style.

Key responsibilities include the following:

- Plan, direct and coordinate operations for Public Works, Utilities, Water/Waste Water, Engineering, Facilities Maintenance and Urban Forestry;
- Ensure all City infrastructure is maintained in a safe and serviceable condition;
- Develop, maintain and implement plans for all departmental infrastructure, deriving and adhering to capital and operating budgets for same;
- Prepare, implement and maintain Asset Management plans, providing for maintenance and renewal of all infrastructure, both annual and long-term;
- Oversee residential and commercial development, ensuring compliance with the City's standards for infrastructure;
- Perform engineering analysis and surveys, preparing detailed plans, designs and contract administration for infrastructure and projects;
- Provide leadership and supervision for development of GIS infrastructure and the GIS team;
- Together with managers and supervisors, develop departmental plans consistent with Council's corporate and operational objectives;
- Ensure the City is prepared for the impacts of industrial, commercial and residential growth;
- Plan for changes to regulations and standards that impact the ability of the City's infrastructure to meet regulatory requirements;
- Act as an effective liaison between City Manager, staff, residents, private entities and all levels of government.

The preferred candidate will have the following qualifications:

- Professional Engineer licensed with APEGM, preferably with a minimum of five years of practical experience in a municipal field;
- Familiarity with construction industry and codes;
- Comprehensive knowledge of civil engineering principles, practices and methods as applicable to a municipal setting;
- Able to develop clear understanding of relevant City policies, laws and regulations;
- Ability to conduct necessary engineering research and compile comprehensive reports combined with experience in analyzing, planning and controlling major projects;
- Proficient in use of Microsoft Office software, AutoCAD Civil 3d and water/sewer modelling software
- Practical knowledge and experience in computer systems for GIS
- Demonstrated ability as a solid decision maker with a high level of ethics, values and integrity;
- Exceptional oral and written communication skills, demonstrating a strong aptitude to work with both the public and employees;
- Must possess a valid Manitoba driver's license.
