

KOCH FERTILIZER CANADA, ULC

GROW YOUR FUTURE WITH KOCH FERTILIZER CANADA, ULC!

- A **culture** that places top priority on integrity and compliance
- Opportunity for career growth at one of the largest, financially stable companies in the world
- Encouragement to **challenge** the status quo and share knowledge
- Responsibilities and rewards based on contributions
- Continued **company growth** as a result of reinvesting 90% of our earnings

Based in Brandon, Manitoba, we synthesize and blend nitrogen, phosphate, and sulfur products with ammonia, which we market primarily in the prairie provinces of Canada and the northern United States. Operating 24 hours a day, 365 days per year, we employ approximately 270 dedicated team members. Our fundamental commitment to safety, health, and environmental stewardship drives all our processes.

VIBRATION SPECIALIST

You will:

- Analyze field data gathered by the Vibration Technician; keep track of the facility's online condition-based monitoring system, and analyze results by extracting data and evaluating with a high degree of accuracy
- Be responsible for portable and continuous vibration data analysis and recommendations to ensure the reliability of equipment
- Act as the administrator for the continuous monitoring systems (MHM/WINDROCK/CSI)
- Use the CSI system to monitor and ensure reliability of equipment monitored and to assist in system troubleshooting
- Ensure practices for balancing rotating equipment, both in the field and in the shop, are followed
- Conduct machinery failure analyses and implement recommendations to improve equipment reliability with other maintenance and operations team members
- Mentor and assist the Vibration Technician
- Be proactive in improving reliability of equipment through troubleshooting and problem-solving abilities
- Review maintenance procedures and assist in development of new procedures
- Act as the Job Coordinator
- Perform other related job duties as required

The qualifications you have include:

- At least five (5) years of directly related practical experience in an industrial setting
- Technical diploma in a related field (ie. mechanical, turbo-machinery); mechanical engineering degree is preferred
- Qualified Vibration Technician Certification - Levels 1 and 2; Level 3 is considered an asset
- Experience with Emerson CSI hand-held vibrate equipment (CSI 2140) is preferred
- Experience on condition monitoring systems is preferred
- Experience with WINDROCK (continuous monitoring of reciprocating Compressors) is preferred
- Experience with Turbo Machinery is preferred
- Proven organization and time management skills; detail-oriented; high level of integrity, honesty and professionalism; able to work independently
- Excellent verbal and written communication
- Strong analytical, critical, economic thinking, problem solving and customer service skills
- Ability to multitask in a fast-paced environment

The work environment you'll be entering requires and includes:

- Ability to work in an industrial manufacturing environment
- Availability for flexible hours based on job requirements
- Manual dexterity required to use desktop computer and peripherals
- Ability to work outdoors in all types of weather
- Ability to climb stairs, ladders, and work at heights

- Occasional exposure to fumes/airborne particles
- Ability to pass pulmonary breathing test
- Ability to wear a gas mask-type respirator and PPE
- Tolerance to occasional exposure to fumes or airborne particles and toxic/caustic chemicals with appropriate PPE
- Unassisted physical mobility in and around plant and equipment
- Ability to sit, stand, kneel as necessary
- Ability to travel to and enter site to access equipment
- 10% travel, including air
- Ability to lift and carry up to (50) pounds

We offer a full extended benefits package including health and dental coverage, pension, and subsidized investment options, as well as nationally-competitive wages and performance-based bonuses with a team that is committed to success! Relocation may be available for this position.
