

RITZ Machine Works is a leading supplier of fabricated metal parts for heavy equipment OEMs, with manufacturing facilities in Dauphin, Manitoba and Cambridge, Minnesota.

RITZ Machine Works invites applications for the following position:

Manufacturing Engineer/Technician (Dauphin, MB)

The Opportunity

Reporting to Manager of Engineering, the Manufacturing Engineer will work with the engineering team, shop floor personnel and with sales, production, purchasing and customer service to create solutions that facilitate fabrication of production parts.

Responsibilities:

- Provide shop floor drawings and specifications based on customer requirements
- Work with shop floor personnel to facilitate efficient production
- Communicate with customers regarding suggested design changes and technical questions
- Maintain production records in ERP software
- Design tools/fixtures to facilitate fabrication and ensure quality of production parts
- Create production processes that incorporate safety, quality and productivity
- Contribute to continuous improvement activities and special projects

Education, Skills and Knowledge:

- Degree/Diploma in Mechanical Engineering, Mechanical Engineering Technology or similar program
- Minimum two years' experience in a manufacturing environment
- Experience with CAD and ERP Software
- Strong verbal and written communication skills
- Ability to work independently and as a team member
- Time management skills, ability to meet deadlines and work with minimal supervision
- Experience with Email and Microsoft Office products
- Aptitude and willingness to learn ERP Software
- Present a professional image, attitude and behaviour

Apply in person at 507 – 1st Ave SE, Dauphin, MB or email resume to ritzm@ritzmachine.com
