

Production Manager

Connecting you to Opportunity

Viterra is seeking a Production Manager to lead the crush and refinery operations at our Canola Processing Facility in Ste. Agathe, Manitoba. The successful candidate will be accountable for plant operations, ensuring employee safety and quality to customers, as well as achieving the strategic manufacturing objectives and supporting the company's sustainable growth.

Key Responsibilities:

- Manage the production, storage and loading of products handled by the facility.
- Monitor production volumes, costs, quality and yields in all production process to ensure KPI targets are met and improvements are made.
- Develop long-range production plans based on marketing projections.
- Oversee and coordinate plant projects with General Manager.
- Lead, coach and develop plant supervisors and staff, including participating in our performance management program
- Support the Quality Assurance Manager and other departments in managing relationships with regulatory agencies, support organizations and external resources.
- Direct safety and environmental programs and identify improvement opportunities to ensure a safe work environment.
- Support overall Quality Control, including but not limited to production quality, FSSC 22000 compliance, audits, and waste management and staffing.

Knowledge and Skills:

- Excellent leadership abilities and interpersonal skills, with a commitment to lead and support values based safety efforts.
- Thrives in a challenging and changing team environment.
- Has the ability to build and maintain relationships with internal and external clients.
- Strong judgment and proven ability to handle complex operational issues.
- Demonstrated ability to manage projects, takes ownership, and follow through on commitments.
- Strong interpersonal and communication skills, with a proven ability to successfully communicate operational goals and objectives to the workforce.

Education and Qualifications:

- Five to ten (5 to 10) years of successful operations management experience in a food processing facility.
- Experience in crush and refining manufacturing is preferred.
- Post-Secondary Degree in Bio-systems or Mechanical Engineering.

Equivalent combinations of education and experience that result in the required level of knowledge skill and competence will be considered.
