

Power and Mine Supply Co. Ltd. is a Winnipeg based distributor and system fabricator specializing in serving the needs of those involved in pulp & paper, mining, chemical processing, power generation, water distribution, wastewater treatment, oil and gas production, irrigation, pipeline, pharmaceutical, aerospace, general industry, and agriculture.

We have been serving central Canada since 1929 and currently have locations in Winnipeg (head office), Thunder Bay, Saskatoon, and Regina.

Power & Mine Supply is recruiting for an **Application Engineer (or EIT)** to work out of our Winnipeg office. This is a permanent position with competitive salary, benefits, and opportunity for bonus.

As a Manufacturer's Representative, Power & Mine Supply represents World Class Manufacturers of Engineered Industrial Equipment. This is a growth opportunity for the right individual. If you feel you have solid communication and technical attributes. We will provide the training you will need for the advanced niche-technical expertise required.

Overview:

- Provide product application and order management support for our customers while additionally supporting outside sales personnel.
- Develop and maintain customer relationships both internal and external by handling customer concerns / complaints and responding to customer inquiries.

Qualifications:

- Attention to detail with strong documentation and follow up skills.
- Demonstrate an ability to manage small and large projects from start to finish and maintain customer confidence and satisfaction in the product or service provided.
- Offer excellent technical communication skills (both verbal and written), computer skills and customer service skills.
- Able to lead, organize, prioritize and multitask.
- Capable of learning quickly and working independently, while embracing a team attitude
- Have an outgoing personality and enjoy working with people both on the phone and in person.

Why work for Power and Mine Supply?

Power & Mine Supply aspires to create a work environment for its employees that will result in the company having long term employees. We are committed to the continual development of our people, making them the best team in our industry.

We are a small, technical team of Professional Engineers, CET's, C Techs, Millwrights, and many other technical personnel who support our clients in the application of the engineered products that we sell and service.

Resumes will only be accepted up until July 23rd with work to begin at the successful candidate's convenience. Please apply at jobs@powerandmine.ca.
