Position and Responsibilities

As the superintendent, process, you are responsible for providing leadership to the process team to ensure they are working effectively with other departments to achieve Cameco's goals and directives. You will liaise with corporate technical teams to collaborate on various projects and initiatives. You will be responsible for leading a team of more than 30 people in the mine dewatering, water treatment plant, potable water plant, underground brine distribution, underground grinding, slurry loadout plant, central control, and process technical support teams. You will provide mentorship and development of employees with a focus on a safe and inclusive culture.

Preference will be given to Residents of Saskatchewan's North.

Education and Qualifications

Requirements of the position:

- Bachelor's degree in related engineering field (process, chemical, mechanical, metallurgical)
- Equivalent combination of education and work experience may be considered
- At least 10 years of progressive experience in process or plant operations
- Proven leadership skills with consistent focus on safety and continuous improvement
- Work a rotational schedule and commute to site by aircraft

Assets:

- Familiarity with operational reliability, Lean and/or Six-Sigma
- Previous site or other operation experience with similar equipment or methods
- Familiar with plant automation and digital technology
- Previous uranium mining/processing experience

Safety is a top priority at Cameco. Successful candidates for all positions at safety-sensitive sites or in safety-sensitive positions must take and pass a substance test (which includes marijuana testing) as a condition of employment. Marijuana remains in a user's system for about 30 days, so applicants who recently used marijuana recreationally should not expect to pass a substance test.
