

Come Live Our Values

Manager, Operations

McArthur, SK

Position and Responsibilities

As the manager, operations, you are responsible for providing senior leadership to the mining operations team, ensuring all departments are working together to deliver on operational budgets and initiatives in order to achieve the collective goals of the organization. Working in partnership with the site management team, you will implement various process improvement initiatives to increase efficiency and effectiveness while maintaining safety standards. You will be responsible for leading the mine operations, shaft operations, site services, technical services, and process operations teams. This includes managing a budget of approximately \$120 million and leading a team of over 200 employees and contractors. You will provide mentorship and development of employees with a focus on a safe and inclusive culture.

Preference will be given to Residents of Saskatchewan's North.

Education and Qualifications

Requirements of the position:

- Bachelor's degree in mine engineering or a related field
- At least 15 years of progressive experience in multiple related areas with 5 years in a leadership role
- Previous underground mine site operational experience
- Proven track record of safety leadership
- Equivalent combination of education and work experience may be considered
- Work a rotational schedule and commute to site by aircraft

Assets:

- Familiarity with operational reliability, Lean and/or Six-Sigma
- Experience with uranium mining
- Exposure to current mine equipment, automation, and digital technology

- We offer:**
- competitive pay
 - superior benefits
 - employee share ownership plan for all employees
 - Live Better wellness program

Cameco values diversity. In keeping with this principle and our employment equity goals, we particularly encourage qualified applicants from the designated equity groups to apply.

Safety is a top priority at Cameco. Successful candidates for all positions at safety-sensitive sites or in safety-sensitive positions must take and pass a substance test (which includes marijuana testing) as a condition of employment. Marijuana remains in a user's system for about 30 days, so applicants who recently used marijuana recreationally should not expect to pass a substance test.
