PLATFORM PART 1 – EXPRESSION OF INTEREST

Please tell us why you are interested in serving on Council and what you bring to the role.

I am interested in serving on the Council because I believe Engineers Geoscientists Manitoba (EngGeoMB) plays an important role in protecting the public interest and maintaining professional standards. As a Professional Engineer (P.Eng.), I strongly believe that we all have a responsibility to contribute to our profession through the Association. Serving on Council is an opportunity for me to give back to the Association that has supported my professional growth in Manitoba.

As a Project Manager with the City of Winnipeg, Professional Engineer (P.Eng.), and Project Management Professional (PMP), I bring extensive experience in delivering complex capital infrastructure projects across the public and private sectors. Having worked on projects across Asia, Africa, and North America, I have developed the ability to work effectively in diverse environments. This experience has strengthened my commitment to collaboration and accountability.

2026 COUNCIL ELECTION PLATFORM

In addition to my professional career, I have served as Treasurer of the India Members Chapter, where I have enjoyed connecting with members and supporting professional activities.

If elected, I will bring my experience and a collaborative approach to support strong governance and my contribution to the successful implementation of EngGeoMB's 2025–2029 Strategic Plan.

PLATFORM PART 2 – THE PUBLIC OF MANITOBA

The Association governs and regulates the professions in the public interest. What is, or what should, Council be doing to ensure that its governance is in the public interest and why?

I believe that Council's primary responsibility is to ensure that every decision is made in the public interest. This includes maintaining high standards of professional competence, ethics and accountability while ensuring that the Association remains transparent and accountable to the public.

I also believe that Council should regularly review its policies and governance practices to ensure they remain in the public interest while considering technological advancements and societal expectations.

Conducting surveys and engaging with members is important and every decision should ultimately reflect the public interest.

PLATFORM PART 3 – THE ASSOCIATION

Council sets the expectation for the Association through the Strategic Imperatives and Outcomes within the Strategic Plan. What is the most important Strategic Imperative and why?

I believe the most important Strategic Imperative is *"The public will recognize the value of professional engineers and geoscientists"* because public trust is the foundation of our profession.

Engineers play a vital role in designing, building, and maintaining the infrastructure and systems that people rely on every day. Helping the public understand the value of licensed professionals strengthens confidence in our profession and reinforces the importance of professional standards and ethics.

As Manitoba continues to grow and become more diverse, it is equally important that newcomers and the broader public understand the role of EngGeoMB and the value that licensed engineers and geoscientists bring to society. Increasing awareness of our profession not only helps protect the public but also inspires future generations to pursue careers in engineering and geoscience.

PLATFORM PART 4 – THE COUNCIL

Council sets out the core characteristics of what it considers to be a good councillor in GP-6 Councillor Roles and Job Description. What is the most important characteristic of a good councillor and why?

Among the core characteristics identified in GP-6, I believe the most important is "Commitment to linking with the legal and moral ownership." To me, this means that a councillor should always remember who they serve and who they are accountable to. A councillor must understand that their responsibility extends beyond representing a specific employer or industry group. Instead, they must act as a steward of the Association and the profession.

2026 COUNCIL ELECTION PLATFORM

I believe a councillor should actively seek to understand the perspectives of members before making recommendations. By doing so, Council can make informed decisions, fulfil its fiduciary responsibility, and maintain the trust and confidence of the public and the profession.
