

Manitoba Government Job Opportunities

Manager, Electrical Engineering

Regular/Full-Time

Manitoba Labour, Consumer Protection and Government Services

Technical Services, Capital Projects Planning and Delivery

Winnipeg, Manitoba

Advertisement Number: 40090

Salary Range: \$97,024.00 - \$123,313.00 per year

Closing Date: December 11, 2022

The Manitoba government recognizes the importance of building an exemplary public service reflective of the citizens it serves, where diverse abilities, backgrounds, cultures, identities, languages and perspectives drives a high standard of service and innovation. The Manitoba government supports equitable employment practices and promotes representation of designated groups (women, Indigenous people, persons with disabilities, visible minorities).

Employment Equity is a factor in selection for this competition. Consideration will be given to women, Indigenous people, visible minorities and persons with disabilities.

An eligibility list may be created for similar positions and will remain in effect for 12 months.

Capital Projects Planning and Delivery (CPPD) is a division within the Department of Labour, Consumer Protection and Government Services. CPPD's core business area responsibilities include:

- Capital planning, technical services support, and the delivery of capital projects for core government departments (excluding the Department of Transportation & Infrastructure, and the Department of Health);
- Central coordination, negotiation, and implementation of federal-provincial cost-shared capital infrastructure programs and projects;
- Facilitation of innovative alternative delivery models and solutions to make atypical, strategic and complex projects possible, such as P3 methodologies, for large infrastructure projects and coordinate strategic initiatives related to capital development.

Conditions of Employment:

- Must be legally entitled to work in Canada

- Must provide and maintain a Satisfactory Criminal Record Check
- Bachelor Degree in Electrical Engineering
- Registered or eligible for registration as a Professional Engineer with Engineers and Geoscientists of Manitoba (EGM)
- Must be able to travel to various locations around the Province via air or ground transportation.
- Must possess and maintain a valid class 5 drivers licence

Qualifications:

Essential:

- Experience related to electrical engineering design in an engineering consulting environment.
- Experience in project management, involving delivery of projects from inception, planning, design, up to and including the completion of construction.
- Strong verbal communication skills with the ability to discuss complex matters while managing stakeholder relationships.
- Demonstrate strong political acumen as a leader to act with integrity in interactions with people and provide strategic advice at all levels in order to build and maintain trust relationships
- Strong written communication skills with the ability to prepare comprehensive reports with analysis that include conclusions and recommendations.
- Experience with human resource practices (i.e.: training and development, coaching, labor relations, mentoring, conflict resolution and understanding of collective agreements)
- Experience in financial management as it related to capital planning of large and complex programs, projects and budget evaluation.
- Ability to undertake research to develop proposals to introduce industry innovations into department operations and successfully manage the change
- Proven ability as a leader with providing direction on the design and implementation of legislation, policies and programs.
- Strong conflict resolution skills including problem solving, negotiation and facilitation skills.

Duties:

The Manager, Electrical Engineering is responsible for the concurrent administration of numerous single and multi-discipline Capital projects from identification of a requirement by a client department to the successful completion of the request. This is highly complex managerial work with overall responsibility for assignments requiring broad encompassing decisions, extensive planning and coordination of outside consultants and contractors, inside professional disciplines, and other related services. The position is also responsible for the delivery of Electrical Engineering services to the Branch, the Division and other Departments and Agencies of the Government.
