

EMPLOYMENT OPPORTUNITY

Closing Date: 24.01.2025

ENVIRONMENTAL ENGINEER WINNIPEG, MB

Manitoba Hydro is consistently recognized as one of Manitoba's Top Employers!

Great Benefits

- Competitive salary and benefits package.
- Defined-benefit pension plan.
- Nine-day work cycle which normally results in every other Monday off, providing for a balanced approach to work, family life and community.
- Flex-time and partially remote work schedule (providing the option to work remotely 3 days per 2 week period), depending on nature of work, operational requirements and work location.

Manitoba Hydro is a leader among energy companies in North America, recognized for providing highly reliable service and exceptional customer satisfaction. Join our team of Manitoba's best as we continue to build a company that supports innovation, commitment, and customer service, while actively supporting a diverse, equitable and inclusive workplace.

We are seeking an Environmental Engineer to work in the Generation Environmental Services Department. Under the general direction of the Senior Contaminated Sites Lead, you will lead the Potentially Contaminated Sites Management Program, other contaminated land investigations, and remediation projects, and provide specialized engineering support for other contaminated site related activities. You will also provide wide-ranging technical leadership and/or environmental assistance to the department and other enterprise teams in support of property transactions, asset planning and delivery, and operations.

Responsibilities:

- Lead the Potentially Contaminated Sites Management Program and other activities related to contaminated site assessment, restoration, and reclamation as follows:
 - Establish and manage program goals and budgets.
 - Evaluate, prioritize, and schedule contaminated site investigation, restoration, and remediation projects, taking into account Manitoba Hydro priorities and environmental, technological, financial, regulatory, and social considerations.
 - Acquire regulatory approvals and submit and explain reports to regulatory authorities.
 - Keep current with, influence development of, and apply applicable regulations, policies, and practices and interpret implications for the contaminated sites program.
 - Conduct Phase I Environmental Site Assessments and interpret results.
- Procure and manage engineering consultants and internal contaminated site services.
 - Develop tender documents, evaluate proposals, and select engineering consultants.
 - Define scope of work and manage engineering consultants and internal contaminated site services.
 - Review, revise, and finalize engineering reports, designs, and calculations to ensure technical integrity and compliance with environmental policy, legislation, and standards.
 - Authenticate contaminated site investigation and remediation reports written internally with a Professional Engineer's seal.
- Provide contaminated site related advice.
 - Interpret results of technical reports and use professional judgement to advise Department Managers, Project Managers, and other internal customers of remedial options, potential risk, and liability.
 - Act as an internal resource for contaminated site related expertise and advice.
- Supervise and mentor Engineering Interns (EIT) when an EIT is assigned to the Generation Environmental Services Department.
- Assist with the prioritization and risk management of the Impacted and Contaminated Sites Portfolio.
- Manage and revise the Contaminated Site Database.
- Develop and maintain effective working relationships with internal and external personnel, including local, provincial, and federal environmental agencies and practitioners.
- Participate as required on various project teams, providing specialized engineering and environmental support that is not limited to contaminated site management.

Qualifications:

- Graduate in Engineering or in a discipline related to the Environment or Geosciences from a university of recognized standing with six years of combined experience in Contaminated Site Management, Environmental Management, and Project Management, plus membership in good standing with EGM.
- Experience in earth sciences, conducting and leading environmental site assessments, site remediation, restoration and reclamation projects, and other areas of environmental work.
- Working knowledge of provincial and federal environmental regulatory requirements and practices, particularly those relating to contaminated sites.
- Experience working with Provincial and Federal Government Departments and other organizations.
- Experience working with Indigenous communities and organizations would be an asset.
- Experience interpreting engineering/technical reports, environmental engineering drawings, and sketches.
- Ability to write and communicate in a clear and concise manner.
- Possess a strong initiative and capable of working in teams.
- Must be prepared to occasionally travel and to work outside of normal business hours.
- Possess a valid Province of Manitoba Driver's Licence.

Salary Range

Starting salary will be commensurate with qualifications and experience. The range for the classification is \$47.32-\$65.33 Hourly, \$90,677.86-\$125,192.08 Annually.
