

## **Engineer, Projects (40858)**

*Location: Saskatoon, SK*

### **About Us**

Cameco is one of the largest global providers of the uranium fuel needed to energize a clean-air world. Utilities around the world rely on our nuclear fuel products to generate safe, reliable, emissions-free nuclear power. Cameco's corporate office is based in Saskatoon. We have mining operations and projects in northern Saskatchewan, Kazakhstan, the United States and Australia. We are also a leading supplier of uranium refining, conversion, and fuel manufacturing services from our operations in Ontario.

### **The Role**

As a member of the technical services team, you will provide project engineering support to Cameco site operations, projects, and other business units. You will be responsible for leading and coordinating multi-disciplinary teams in the production of technical deliverables on various projects within Cameco. You will lead projects through scoping, design development, and delivery of various executable scopes of work while integrating operations, maintenance, construction, and commissioning into the technical deliverables.

### **In this role, you will:**

- Coordinate resources across multiple groups.
- Facilitate design reviews.
- Prepare scope of supply packages, capital cost estimates, and scope of work documentation.
- Support in planning and preparation of all field execution activities.
- Ensure all technical work is done on schedule, meeting all deliverables while working within agreed to budget targets.
- Be responsible for ensuring that the design work is done in accordance with Cameco's processes, procedures, standards and regulatory requirements and to an appropriate level of quality.

### **Required:**

- Bachelor's degree in engineering
- Four to eight years of relevant industry experience
- Equivalent combination of education and work experience will also be considered
- Professional Engineer (P.Eng.) designation
- Eligible for registration with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)
- Intermittent travel to Cameco's northern sites by aircraft

### **Recommended:**

- Strong communication, problem solving, and teamwork skills
- Experience with working in process plants, mills and underground environments

**Conditions of Employment:**

- Substance test

**Cameco is proud to offer a competitive total reward package which includes:**

- Competitive compensation program with base and variable pay
- Flexible health, drug, dental, and vision plan with a health spending and personal spending account
- Fixed benefits including employee and dependant life, AD&D, disability benefits and paid vacation leave
- Employee & Family Assistance Programs
- RRSP and RPP matching program
- Career development opportunities
- Relocation costs

Cameco is an employment equity employer and aims to achieve gender parity, and as such, preference will be given to qualified members of equity groups. We are strengthened by the diverse backgrounds of experiences and encourage applicants with various levels of expertise to apply, as equivalent combination of education and work experience are considered.

You will have the opportunity to work a hybrid work schedule with regular weekly presence in the Saskatoon office and intermittent travel to site. The details of this flex work arrangement will be discussed with you in the recruitment process.
